

AUTOMATED SHIFT CALLOUT (ASC)

Q#7

**How do I stop receiving
ASC shift offers on a
given day?**

**A: Reply U + reference
number (e.g. U87224) by text
or email.**

To turn shift notifications off and set ASC to “do not disturb”, use the U + reference number response format. This will stop you from receiving all shift offers for the remainder of the day including any new shifts that day, or in the future until 23:59.

Keep in mind that short-call will be filling shifts up to seven days in advance so be cautious when using this response code.
