

# AUTOMATED SHIFT CALLOUT (ASC)

## What is ASC?

- Automated Shift Callout (ASC) is a new solution used by the PHC Staffing Office to schedule vacant shifts to employees via voice calls, text messages, emails and a new online employee portal.
- ASC allows you to take control of where, when, and how you receive shift offers. The new employee portal will let you manage your contact preferences and shift offers online.
- ASC is not used for pre-booking or shift unavailability.
- ASC makes the shift offer process more efficient and accessible by changing how shifts are called out – everything else stays the same.
